

Employment is a primary goal of most people with serious mental illness. The Compass Health Network IPS Supported Employment program is designed to provide support to increase the number of consumers working in sustained, competitive employment.

Principles of IPS Supported Employment

Focus on Competitive Employment:

Agencies providing IPS services are committed to competitive employment as an attainable goal for consumers with mental illness seeking employment.

Locations:

1800 Community Drive
Clinton, MO 64735

227 Metro Drive
Jefferson City, MO 65109

Supported Employment

IPS Services:

- Job Development
- Job Search & Support
- Job Interview Preparation
- Job Attire/Travel Expense Support
- Supportive Services/Benefits Planning
- Continued Job Maintenance Support

Benefits planning will be provided to all individuals placed in IPS services to provide counseling, information and answer any questions or concerns about how the income from working will influence their benefits.

IPS Practice & Principles:

IPS supported employment helps people with mental illness work at regular jobs of their choosing. Although variations of supported employment exist, IPS (Individual Placement and Support) refers to the evidence-based practice of supported employment.

Individual Placement and Support is a partnership between Compass Health Network, Missouri Vocational Rehabilitation (part of DESE) and the Missouri Department of Mental Health.
